blis touching \$4.63, an overmish vise of 4 cents, and a new high price since 1910. The externs low was \$3.13 in February, 1220. Today rate brings the depreciation from par, which is \$4.86 a.8, to less than 6 per cent. Under the provisions of the new tariff act when the depreciation from par, which is \$4.86 a.8, to less than 6 per cent. Under the provisions of the new tariff act when the depreciation is 5 per cent or more, the valuation of foreign currency 26 customs purposes shall be "the buying rate in New York at moon on the day of exportation," which is certified to by the federal reserve bank. When the depreciation is less than 5 per cent the customs rates are based on the par value of exchange. Thus if the present stering rate is maintained it will subomatically serve to increase the import duties on British goods. Special stocks in which there are possibilities for extra, increased or stock dividends, continued to receive the most attention. There was some good buying in the railroad group, but early gains were materially removed the passed or wiped out in later trading.
